

INFO SOLUTION S.P.A.

COMPANY PROFILE

We innovate the future

www.infosolution.it

INFO SOLUTION SPA

INDEPENDENT ITALIAN COMPANY,
SPECIALIZED IN THE DESIGN
AND MANUFACTURING OF ELECTRONIC
SYSTEMS AND SOFTWARE PLATFORMS

Founded in 1998 in Milano,
private capital, shared capital about 1 million €

100+ employees, headquarters in Milano, operational sites in
Roma and Genova

We support our customers providing consultancy services
to meet their specific needs

We design and produce complete electronic systems

Creation of new innovative product lines

ISO 9001:2015 - Design and manufacturing of complete
systems and parts (hardware, software, mechanical parts).

EN 9100:2016 - Design and manufacturing of complete
systems and parts (hardware, software, mechanical parts)
for the Aerospace Industry

20 years of activity

For over 20 years we have been involved in software development, design and production (ODM) of electronic systems dealing with hardware, firmware, software and mechanical design, integration, testing and validation, engineering for mass production.

"Turnkey" projects

15+ "turnkey" projects realized in 2017: embedded systems designed and developed based on customer specifications in the areas of Smart Metering, Aerospace and Appliances and IoT.

Technological transfer

We invest in highly innovative sectors, developing our own product lines and encouraging the technological transfer.

Specialized resources

Our team is made up of system analysts, hardware engineers, software and firmware engineers, test engineers, mechanical designers, quality and production engineers.

SERVICES

DESIGN AND DEVELOP EMBEDDED ELECTRONIC SYSTEM AND SOFTWARE APPLICATIONS

Technological consultancy

We provide our customers the skills and the experience of our engineers, developers and integrators.

Turnkey project

We carry out feasibility studies, software applications and electronic products according to our customers' specifications.

Industrialization and manufacturing

We engineer prototypes, manage assembly and production for our customers based on volumes and target cost.

Industrial research

We develop industrial research projects, for emerging markets, through calls for funding and partnerships with centers of excellence.

AREAS OF EXPERTISE

- Software applications: Windows, Linux, Web, Cloud, Mobile
- Firmware & Embedded Software
- Hardware design, FPGA design
- Mechanical design, mechatronics
- Testing systems design for: prototypes, products, ATE
- System integration, certification support
- Management and Quality: PM, QA, Production management

CERTIFICATIONS

INFO SOLUTION IS CERTIFIED FOR THE
DESIGN AND THE REALIZATION OF
COMPLETE SYSTEMS

UNI EN ISO 9001:2015 ISO 9001:2015 - Reg. No: 00385 - A
PrEN 9100:2016 / AS9100D ISO 9001:2015 - Reg. No: 00385 - N

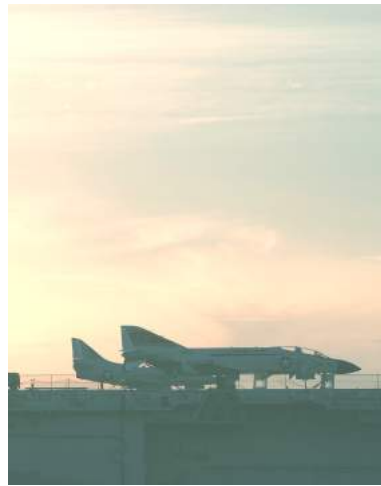

UNI EN ISO 9001:2015 CERTIFICATION

Quality management system applied to:

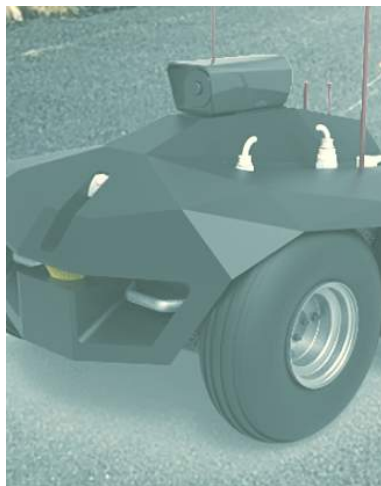

- electronic systems design and software development
- provision of professional services
- system design, (hardware, mechanics), production and research.

EN 9100:2016 CERTIFICATION

Design and implementation of complete systems and their parts (hardware, software and mechanical parts) and delivery of high specialized services for the Aerospace Industry.
